

# Structural Committee Meeting June 16, 2025 | 11:30 a.m.

**Virtually via Microsoft Teams:** 

Join the meeting now

Meeting ID: 282 754 612 843 9

Passcode: 52vW6an7 Or call in (audio only)

+1 564-999-2000,,889653012#US, Olympia

Phone Conference ID: 889 653 012#

In person:

Seattle Airport Marriott Olympia Suite 3201 S 176<sup>th</sup> Street Seattle, WA 98188

**Committee:** Dave Peden, PE, SE, Chair

Marjorie Lund, PE, SE

Chun Lau, PE, SE (pro-tem)

**Support staff:** Ken Fuller, PE, Director

Kristina Horton, PLS, Deputy Director

Shanan Gillespie, Regulatory Program Manager

Vonna Cramer, Licensing Lead

Bryce Dickison, Administrative Assistant Mackenzie Wherrett, Executive Assistant

Elizabeth Lagerberg, AAG

#### **Discussion topics**

- SE Application Forms Updates (VC)
- Review SE Requirement section in RCW 18.43.040 rewrite (SG)
- Exam Pass Rates (VC)
  - SE Applications reviewed between January 1, 2024 and December 31, 2024.
- NCEES Western Zone Engineering Forum (AB)

#### **Strategic Planning Items**

None

## Structural Engineer Registration Application

BOARD OF REGISTRATION FOR PROFESSIONAL ENGINEERS & LAND SURVEYORS

Apply for a structural engineering license by comity or exam.

Online: https://professions.dol.wa.gov

Or by mail: Make checks payable to BRPELS. Send this checklist, form, supporting

documents, and fees to:

Board of Registration for Professional Engineers and Land Surveyors PO Box 3777 Seattle, WA 98124-3777

For questions or help email <a href="mailto:engineers@brpels.wa.gov">engineers@brpels.wa.gov</a> or call (360) 664-1575

Your attention to these details will help us process your application quicker. See experience verification form for qualifying experience requirements.

Attention All Applicants: NCEES Council records are not accepted for Structural Engineering Applications.

#### To get a structural engineer license in Washington State you must:

- Have a current Washington State Professional Engineer (PE) license.
- Demonstrate 2 years of progressive structural design experience in addition to the 8 years of experience required for registration as a professional engineer in Washington State.
- Provide complete explanations to describe the time spent on projects where you developed the knowledge, skills, and abilities in the tasks typically performed in structural designs including;
  - Significant structures or structural systems integrated within significant structures. RCW 18.43.020(12)
  - Detailing requirements for Seismic regions similar to Washington State (International Building Code (IBC) SDC
     C or above or American Association of State Highway and Transportation Officials (AASHTO) Zone 3 or above)

#### **EXAM applicants' additional requirements:**

To apply to take the NCEES PE Structural exam submit your application by the deadlines noted at broels.wa.gov.

#### **COMITY** applicants' additional requirements:

- If ur initial PE license was granted using any of the approved structural exams, then a NCEES 8-hour Civil: Structural exam must be taken and passed. See a list of approved structural exams.
- Some US jurisdictions may issue a structural engineering license under conditions that are less stringent than the requirements of Washington State.
- Comity licensure will not be considered unless verification of passing one of the following examinations outlined on our website: Structural Engineer by Comity | BRPELS
- You can obtain verifications for examinations and licensure by logging into your NCEES account.

#### Instruction checklist

Initial each item to acknowledge it as completed.

 Structural Engineer Registration Application. All sections must be completed, signed, and dated. Provide detailed information; missing information may result in your application being denied.
 Application fee \$65 non-refundable fee for exam or \$110 non-refundable fee for comity. Submit a completed Structural Engineer Registration Application apply Online or by mail.
_ Structural Engineering Experience and Verification Submit three projects outlining your experience using
different verifiers where possible. Complete your work experience and send it to your verifier/supervisor. The
verifier must complete the work experience verification section and return it by email to
engineers@brpels.wa.gov. The email must be from the verifiers email as shown on the verification form.

## Structural Engineer Experience and Verification

#### **Instructions for applicant**

Provide complete explanations to describe the time spent on projects where you developed the knowledge, skills and abilities in the tasks typically performed in structural designs of **significant structures or the structural systems integrated within significant structures**. RCW 18.43.020(12).

- One sentence descriptions are not acceptable.
- The work should be progressive in difficulty and magnitude; demonstrating sufficient breadth and scope and be reflective of your ability to design and apply engineering principles where your judgments and decisions are trusted and relied upon. Design of these projects must have occurred after you became licensed as a PE in the applicable jurisdiction.
- The work experience should show your personal design of two of the four common materials used (steel, concrete, wood, and masonry) as the primary lateral force-resisting system with ductile detailing.
- Qualifying experience consists of structural design experience in:
  - 1. Determination of lateral/gravity forces —seismic and /or wind
  - 2. Selection and design of the primary framing systems
  - 3. Selection and design of foundation systems
  - 4. Application of code requirements with emphasis on seismic provisions and ductile detailing
  - 5. Multi-story buildings or equivalent multi-level structures or bridges over 200ft
  - 6. Project leadership and design decision management

per cribe your structural design experience of significant structures or the structural systems integrated within significant structures (RCW 18.43.020(12)) by listing a **minimum of three projects**. The experience projects must be submitted as part of your application with different verifiers where possible. If you only have one licensed structural engineer verifier, submit a written letter explaining why and provide a client for the verifier of one of the projects.

#### Provide detailed information for the following:

- Type of building structure or non-building structure and/or bridge with a total span (end to end) of 200 feet.
- Provide a detailed explanation of how the project incorporates the seismic provisions and ductile detailing requirements for Seismic regions similar to Washington State (SDC C or above or AASHTO Zone 3 or above)

Send the completed work experience descriptions and verification form (pages 1-9) to the people verifying your engineering experience. Each project must be verified. The verifiers must complete their portion and send it directly from their email address to <a href="mailto:engineers@brpels.wa.gov">engineers@brpels.wa.gov</a>

- Experience must be gained under the direct supervision of a licensed structural engineer, or a licensed professional engineer with the authority to practice structural engineering in their jurisdiction.
- For work experience to be accepted as satisfactory, each project must be separate and distinct.
- Missing information or poor explanations of structural experience will delay the review and could result in a
  denial of your application. Do not assume that there is a universal understanding by reviewers on how your
  experience satisfies Washington State requirements. Do not use jargon or acronyms or one-line explanations

NOTE: All items must be completed for each project listed. Each project must be summarized on the forms provided ("See Attached" is not acceptable). Additional sheets may be added but not substituted for the form.

#### RCW 18.43.040 Registration requirements.

The following will be considered as minimum evidence satisfactory to the board that an applicant for licensure is qualified to be a professional engineer, structural engineer, or professional land surveyor:

- 1. Professional Engineer: To be licensed as a professional engineer, an applicant must meet the following requirements:
  - Examination requirements: An applicant must have received passing scores on examinations required by the board which include:
    - A board approved examination on the fundamentals of engineering which tests the applicant's knowledge of appropriate fundamentals of engineering subjects, including mathematics and the basic sciences.
    - ii. A board approved examination on the principles and practice of engineering which tests the applicant's ability to apply knowledge and experience in the engineering field.
    - iii. Other examinations as determined by the board.
  - b. Experience requirements: A specific record of eight years or more of experience in engineering work of a character satisfactory to the board and showing that the applicant is competent to practice engineering.
    - The experience must be broad based and progressive to include gaining knowledge and comprehension of engineering subjects and applying engineering principles.
    - ii. Education and/or teaching at a college or university may constitute a portion of the required experience as follows:
      - (A) An undergraduate degree, or its equivalent, in an engineering program approved by the board will be considered the equivalent of four years of experience.
      - (B) Satisfactory completion of each year of an engineering program may be considered the equivalent of one year of experience at the discretion of the board.
      - (C) An undergraduate degree in a non-engineering program may be considered the equivalent of up to two years of engineering experience at the discretion of the board.

- (D) No more than four years of experience will be granted for undergraduate education.
- (E) Experience may also be granted for teaching and post-graduate education as further defined by, and at the discretion of, the Board.
- iii. The mere execution, as a contractor, of work designed by a professional engineer, or the supervision of the construction of such work as a foreman superintendent shall not be deemed to be the practice of engineering.
- 2. Structural Engineer: Structural engineering is recognized as a specialized branch of professional engineering. A professional engineer must be registered as a structural engineer to provide structural engineering services for significant structures. To become licensed as a structural engineer, an applicant must meet the following requirements:
  - a. Hold a current registration as a professional engineer in this state.
  - b. Have at least two years of structural engineering experience of a character satisfactory to the board, in addition to the eight years' experience required for registration as a professional engineer.
  - c. An applicant must pass additional examinations as prescribed by the board.
- 3. Professional Land Surveyor: To be licensed as a professional land surveyor, an applicant must meet the following requirements:
  - Examination requirements: An applicant must have received passing scores on examinations required by the board which include:
    - i. A board approved examination on the fundamentals of surveying which tests the applicant's knowledge of appropriate fundamentals of land surveying subjects, including mathematics and the basic sciences.
    - ii. A board approved examination on the principles and practice of surveying which tests the applicant's ability to apply knowledge and experience in the land surveying field.
    - iii. Other examinations as determined by the board.
  - b. Experience requirements: A specific record of eight years or more of experience in land surveying work of a character satisfactory to the board and showing that the applicant is competent to practice land surveying.
    - The experience must be broad based and progressive to include gaining knowledge and comprehension of land surveying subjects and applying land surveying principles.

- ii. Education and/or teaching at college or university may constitute a portion of the required experience as follows:
  - (A) An undergraduate degree, or its equivalent, in a land surveying program approved by the board will be considered the equivalent of four years of experience.
  - (B) Satisfactory completion of each year of a land surveying program may be considered the equivalent of one year of experience at the discretion of the board.
  - (C) An undergraduate degree in a non-land surveying program may be considered the equivalent of up to two years of land surveying experience at the discretion of the board.
  - (D) No more than four years of experience will be granted for undergraduate education.
  - (E) Experience may also be granted for teaching and post-graduate education as further defined by, and at the discretion of, the board.

The following will be considered as minimum evidence satisfactory to the board that the applicant is qualified for certification as an engineer-in-training or land surveyor-in-training:

- 4. Engineer-in-training: An applicant that has completed four years of experience of the type outlined in 1(b) of this section and has received a passing score on a board approved examination on the fundamentals of engineering may apply for an engineer-in-training certificate from the board.
- 5. Land Surveyor-in-training: An applicant that has completed four years of experience of the type outlined in 3(b) of this section and has received a passing score on a board approved examination on the fundamentals of surveying may apply for a land surveyor-in-training certificate from the board.

Any person having the necessary qualifications prescribed in this chapter to entitle themselves to registration shall be eligible for such registration although the person may not be practicing their profession at the time of making application.
